◆ OBJECTIVE

To work with adults, adolescents, children, families, and professionals in the field of clinical and forensic psychology to provide affordable and effective interventions for improved health.

◆ SUMMARY

My previous professional experience has included premarital, marital, divorce and co-parenting counseling. My training has emphasized understanding men's and women's gender issues, coping in stepfamilies, and rebuilding relationships within families and with romantic partners. The three specialty focus tools received at the doctoral level included: psychological/forensic assessment, family/marital assessment/treatment, and child/adolescent diagnosis/assessment and treatment. I have experience treating substance abusers of all ages in the inpatient, outpatient, and court ordered and residential group home settings. I have worked with domestic abuse offenders and victims.

My work with child/adolescent sexual offenders/victims has been extensive. I have a background in assessing criminal offenders, victims and non-offending parents. My group treatment experiences have included doctoral level training in treating those with eating problems. The completion of accurate and impartial psychological, psychosexual and psychoeducational assessment and treatment of high-risk children and adolescents and young adults are one of my special areas of interest.
